

James Fisher  
Oil and Gas

# Offshore oil and gas industry solutions worldwide

# Our capabilities

James Fisher and Sons plc is a leading provider of marine services and trusted partner of the oil and gas industry worldwide.

We have developed unparalleled operational expertise in this market, delivering solutions to the most demanding operational and technical challenges faced by our customers.

We provide a comprehensive range of products, services and solutions throughout the exploration, production and decommissioning lifecycle, which include:

- design and engineering of specialist equipment
- platform maintenance and modification
- well test support including Zone II equipment
- subsea engineering and operations
- ship to ship transfers
- provision of pipeline excavation and maintenance services
- artificial lift completion equipment

## Artificial lift with electric submersible pumps (ESP)

A world leader in the provision of Artificial lift completion products and services, including Dual and Multiple Completion Systems and Mechanical, Electrical and Subsea products. RMSpumptools are uniquely positioned to provide the complete end-to-end system, ensuring performance with reliability.

Artificial lift completion equipment • Electrical connectors & penetrators • Subsea connectors & sensors

## Diving & ROV

Global provider of a comprehensive range of diving and ROV services and equipment, including the support of offshore operations, inspection, repair and maintenance, as well as salvage operations.

Diving equipment • Diving services • Diver deployment systems • ROV services & personnel • ROV tooling & equipment • Saturation systems • Hyperbaric equipment

## Inspection & monitoring

We provide world-class specialist advice, products, access solutions and consultancy services for the inspection and monitoring of safety critical and high value assets in the oil and gas energy sector.

Comprehensive NDT & visual inspection • Load cells • Tendon tension monitoring • Riser tension monitoring  
Integrated monitoring & management • FPSO anchor load monitoring • Single point buoy monitoring •  
Offshore berth management • Hull stress monitoring • FPSO swivel load monitoring • Rig survey

## Lifting

An established provider of high quality lifting sales and rental solutions as well as in-house bespoke product design and manufacturing capability to meet specialist requirements.

Bespoke solutions • Hose & umbilical reels • Launch & recovery systems • Load monitoring • Marine cranes • Overload protection systems • Winches & hoists

## Marine services

Marine expertise, innovation and commercial best practice based on 165 years of operational excellence. Combining our global reach and extensive in-house capability we offer a unique combination of specialist skills, resources and capabilities focused on the marine environment and includes:

Fuels infrastructure • Marine safety systems • Offshore personnel • Ship to ship transfer • Surface preparation • Tanker chartering • ATEX design and engineering • Fabrication • Marine projects • Offshore pipeline services • FPSO support

## Mooring & fendering

The world's largest operator of Yokohama pneumatic fenders and a leading provider of shore-side and deck equipment, services and integrated solutions.

Anchor & chain monitoring • Berthing systems • Bespoke fendering • Buoyancy solutions • Deck & mooring equipment • Fendering solutions • Mooring load monitoring • Quick release mooring • Towing hooks • Towing load monitoring

## Offshore support

A comprehensive range of specialist service, support and equipment rental packages, including innovative turn-key solutions, allows us to offer wide-ranging offshore support in the most challenging and hazardous of environments.

Air compressors • Centrifugal pumps • Containerised systems • Heat suppression • Positive displacement pumps • Steam generators • Well test support • PyroSentry™ (methanol fire detection and suppression) • Safety bails • Safety slick joint • Zone II equipment

## Subsea

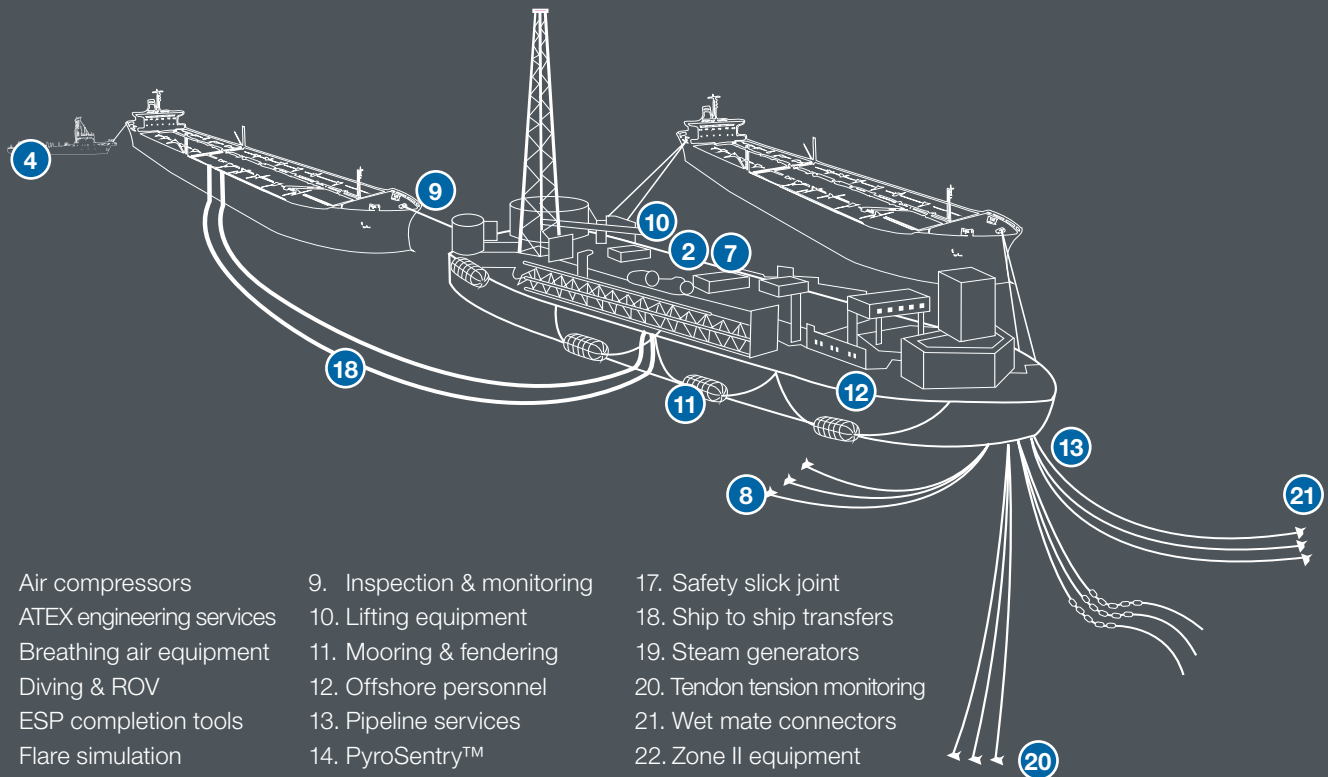

We have an established reputation as a leading international supplier in the challenging subsea engineering sector, providing a diverse range of specialist services and equipment.

HydroDigger (mass excavation) • Subsea tools • Wet-mate power connectors • Load shackles • Strain rings • Search and salvage

# What we do

From turn-key management of facilities and operations, through to the supply of specialist products, support, and transportation services, James Fisher is a pioneer in designing innovative and technical solutions that meet or exceed regulatory, quality and safety standards.

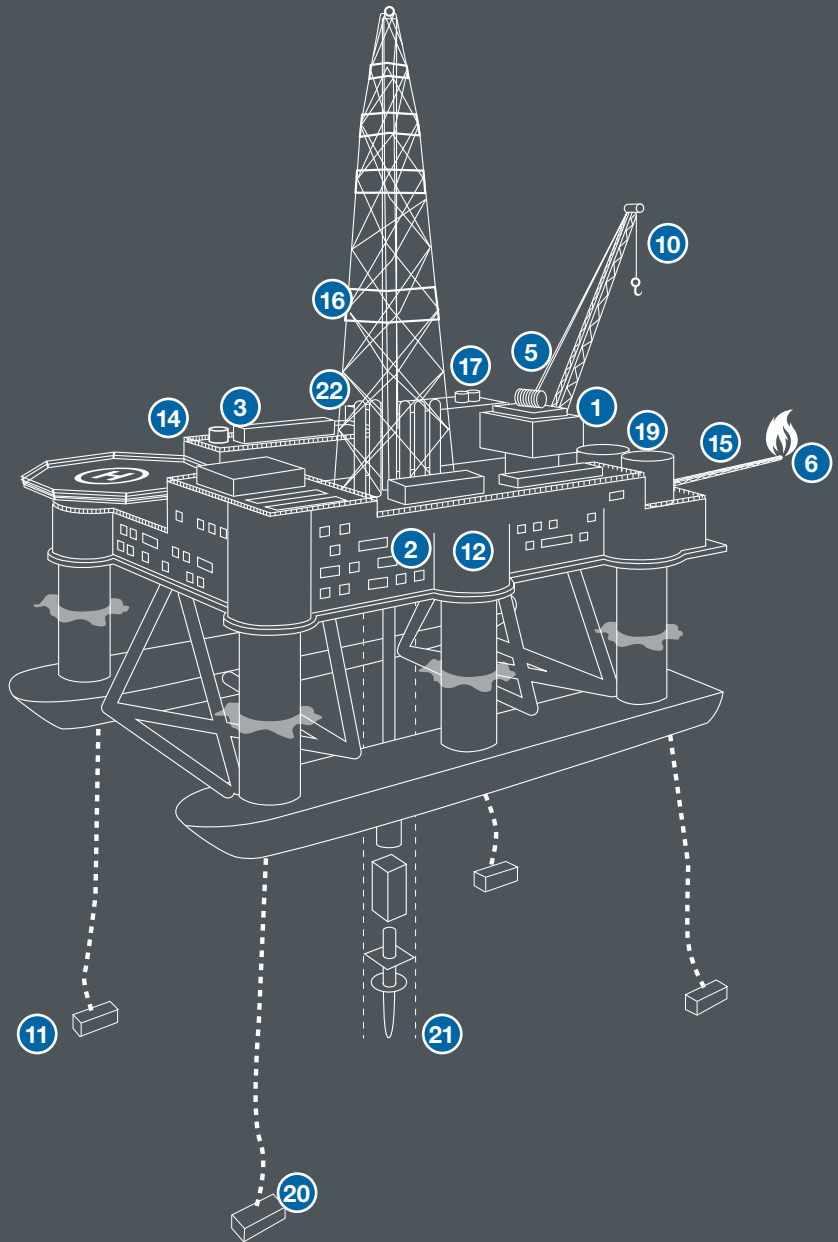

1. Air compressors
2. ATEX engineering services
3. Breathing air equipment
4. Diving & ROV
5. ESP completion tools
6. Flare simulation
7. FPSO support
8. HydroDigger

9. Inspection & monitoring
10. Lifting equipment
11. Mooring & fendering
12. Offshore personnel
13. Pipeline services
14. PyroSentry™
15. Rig cooling
16. Safety bails

17. Safety slick joint
18. Ship to ship transfers
19. Steam generators
20. Tendon tension monitoring
21. Wet mate connectors
22. Zone II equipment

# What we do

The management of health and safety and the safeguarding of the environment are key priorities for us in this challenging sector.
