

Tanker Chartering

Delivering flexible, efficient, and low carbon marine transportation solutions

Approach

James Fisher Everard is a specialist in coastal shipping. We benefit from more than 170 years of experience in coastal tanker trade. We operate a fleet of 16 product and chemical tankers with a range from 3,000 dwt up to 35,000 dwt. Our vessels mainly trade along the United Kingdom and Northern Europe but also in the Caribbean, the Mediterranean and South Atlantic by carrying Clean Petroleum Products and Chemicals.

We perform over 1,000 voyages each year carrying fuel from refinery and terminals to major coastal storage facilities. For remote islands and far flung communities our vessels are often the only reliable and cost effective means of supply.

Coastal shipping around European shores is a tough and unrelenting business which is highly regulated. To perform successfully James Fisher Everard operates to the highest standards, with high quality vessels and very experienced officers.

- Our ships are designed and built to the highest safety specification and regularly inspected by our customers.
- The performance and conduct of our officers and crews is continually measured against demanding standards.
- Each and every voyage is carefully planned to minimise risk.
- Cargo transfers are carefully supervised to minimise risk to individuals and the environment and to provide assurance of cargo quantity and quality delivered.

James Fisher Shipping Services provides a professional and sophisticated technical and crewing management service to the James Fisher Everard fleet. JFSS works to increase HSE performance, fleet utilisation and reduce operating costs of our customers. This has been developed over decades of experience managing ships around the UK coast.

You can't teach experience – local knowledge of sea conditions, ports, berth requirements and vessel / cargo operations are all vital for safe efficient operations and can only be acquired over time.

Customers are at the centre of our business and we work towards operational, technical and commercial excellence by offering flexible, efficient and low carbon marine transportation solutions.

We are committed to reducing our carbon footprint by implementing energy saving measures on our existing fleet, while we invest in new build, energy-efficient vessels.

All these measures allow our customers to place their trust in James Fisher Everard as their chosen supply chain partner.

Fleet List

- mt Sarnia Cherie
- mt Sarnia Liberty
- mt Speciality
- mt Superiority
- mt Seniority
- mt Dee Fisher
- mt Thames Fisher
- mt Mersey Fisher
- mt Shannon Fisher
- mt Solway Fisher
- mt Corrib Fisher
- mt King Fisher
- mt Krestel Fisher
- mt Cumbrian Fisher
- mt Clyde Fisher
- mt Raleigh Fisher
